300G SERIES AIR-COOLED MIDMOUNT^m

Powerful. Fuel Efficient. Economical.

The 300G Series models are equipped with Vanguard EFI engines, with closed-loop electronic fuel injection. EFI technology provides a wide range of benefits including better fuel economy, reliable hot and cold weather starts, reduced engine exhaust emissions and fewer fuel-related service issues.

Hydro-Gear transmissions feature self-contained, heavy-duty commercial transaxles that provide powerful, Grasshopper-smooth response, while integrated cooling fans and 1 3/8-inch (3.5-cm) axles extend service life. Enjoy best-in-class transmission fluid change intervals, reducing costs and maintenance.

The 5.5-inch (14-cm) deep DuraMax[®] deck, with anvil-edge design for exceptional durability, easily convert from wide-pattern side discharge to optional mulching or vacuum collection. The QuikAjust[™] DropPin[™] Height Adjustment makes cutting height change fast and simple. Optional Mulching Kits and PowerVac[™] Collection Systems are available.

The Premium Comfort seat provides 2 inches (5-cm) fore and aft adjustment and is covered with breathable, CoolTemp Cordura[®] fabric that dissipates heat and won't tear or crack with extended use. Iso-mounting absorbs and reduces vibration before it reaches the seat. Coil-spring suspension and foldable, padded armrests add up to all-day comfort for the operator.

QuikAjust Tilt[™] dual steering levers provide 9 inhces (23-cm) of "no tools" adjustment for maximum comfort and fit while maintaining natural arm and wrist positions. The hydraulically dampened levers deliver a smooth, responsive ride and return to neutral when released from both forward and reverse.

A compact wheelbase provides a great power-to-size ratio for easy transport on trailers and through tighter spaces.

The 13.0 gal/49.2 L single-fill fuel tank location lowers the center of gravity, providing more traction and stability for an enhanced ride. The rear bumper protects the rear of the mower while preserving easy access and removal of the service shield.

Mowing speeds up to 16.9 KPH and 2.36 hectares/hr. based on 61" (155-cm) cutting width* For more details visit: grasshoppermower.com/hectares
